Subject: Contact recreation PCLs

All,

Per our discussion, I wanted to confirm that we are proposing to use the TCEQ contact recreation PCLs as protective screening levels for the surface water samples, where applicable. As drinking water is not an expected exposure pathway for these sources, the contact recreation PCLs are more relevant than using the TRRP RBELs. If you have any questions or suggestions regarding this, please let myself or Pablo know.

Thanks,

Dana Szymkowicz, Ph.D.
